IROC's Definition *Who Are WE?*

The Imaging and Radiation Oncology Core Cooperative better known as IROC:

- ❖ Is A New Clinical Trial Quality Assurance Organization comprised of 6 QA Centers with multiple PIs. Began operation on March 1, 2014
- ❖ IROC RT and Imaging Centers have an extensive and impressive amount of experience, knowledge and infrastructure to aid in the improvement of clinical outcomes for cancer patients.

IROC's Mission

Provide **integrated** radiation oncology and diagnostic imaging **quality control programs** in support of the NCI's NCTN Network thereby **assuring high quality data** for clinical trials designed to improve the clinical outcomes for cancer patients worldwide

IROC Principal Investigators

David S. Followill, PhD, IROC Co-director
and principal investigator for radiation oncology
and chief of outreach physics in the Department of
Radiation Physics at the University of Texas MD
Anderson Cancer Center in Houston

Michael V. Knopp, MD, PhD, IROC Co-director
and principal investigator for imaging
and the director of the Wright Center of Innovation in
Biomedical Imaging at Ohio State University in
Columbus, Ohio

IROC Board of Directors Members

IROC Leadership Structure

IROC Executive Committee

Co-Directors: Followill/Knopp

IROC Admin: King/O'Meara/Laurie

IROC's NCTN RT Core Services

Principal supervisors of a core service

IROC's Five General Core Services

1. Site Qualification (**Houston**)

(FQs, ongoing QA (OSLD, visits), proton approval, resources)

2. Trial Design Support/Assistance (**All IROC QA Ctrs**)

(protocol review, templates, help desk, key contact QA centers)

3. Credentialing (**Houston, Philly (RT)**)

(tiered system to minimize institution effort)

4. Data Management (**Houston, Philly(RT), Rhode Is.**)

(pre-review, use of TRIAD, post-review for analysis)

5. Case Review (**Houston, Philly(RT), Rhode Is.**)

(Pre-, On-, Post-Treatment, facilitate review logistics for clinical reviews)

RT Credentialing Requirements	Web Link for Procedures and Instructions: http://irochouston.mdanderson.org			
	Treatment Modality			Key Information
	SBRT	IMRT	Proton	
Facility Questionnaire	X	X	X	The IROC Houston electronic facility questionnaire (FQ) should be completed or updated with the most recent information about your institution. To access this FQ, email irochouston@mdanderson.org to receive your FQ link.
Credentialing Status Inquiry Form	X	X	X	To determine whether your institution needs to complete any further credentialing requirements, please complete the “Credentialing Status Inquiry Form” found under credentialing on the IROC Houston QA Center website (http://irochouston.mdanderson.org)
Knowledge Assessment	N/A	N/A	N/A	
Benchmark Cases	N/A	N/A	N/A	
Phantom Irradiation	X	X	X	A liver phantom study provided by the IROC Houston QA Center must be successfully completed. Instructions for requesting and irradiating the phantom are found on the IROC Houston web site (http://irochouston.mdanderson.org). Note that only the most sophisticated technique needs to be credentialed, e.g., if credentialed for IMRT, 3DCRT may be used. VMAT, Tomotherapy, Cyberknife and proton treatment delivery modalities must be credentialed individually.
IGRT Verification Study	X	X	X	The institution must submit a sample of verification images showing their ability to reproducibly register daily IGRT information with a planning CT dataset (i.e., the GTV falls within the CT simulation defined PTV). The patient (“as if patient”) used for this study must have a target (or mock target) in the liver. The information submitted must include 2 IGRT datasets (from 2 treatment fractions) for a single patient and must employ the method(s) that will be used for respiratory control for patients entered from a particular institution (e.g. abdominal compression, breath hold, etc...). This information with a spreadsheet (the spreadsheet is available on the IROC Houston web site, http://irochouston.mdanderson.org)
Pre-Treatment Review	X	X	X	The first patient to be enrolled from each institution will be planned per NRG-GI001 specifications and submitted via TRIAD for evaluation by the IROC Houston QA Center and the trial PI or designee. Feedback will be given to the institution within 3 business days regarding any concerns prior to the patient being treated. Any required treatment plan modifications must be resubmitted for evaluation prior to treatment.
Credentialing Notification Issued to:				
Institution				IROC Houston QA Center will notify the institution and NRG Headquarters that all desired credentialing requirements have been met.

The ACR/IROC Cloud

TRIAD

What is TRIAD

TRIAD™ is the American College of Radiology's (ACR's) image and data exchange platform. TRIAD is a standards based open architecture platform that supports HIPAA security rules relevant to Clinical Trials. It automatically de-identifies the DICOM headers and cleans the PHI from the DICOM images before submission via the internet. Access to the application is role-based and controlled by username and password.

Accessing TRIAD

- Integrated with CTSU log in using CTEP-IAM username and password
- Any staff who will be submitting RT digital data **MUST** be listed on the site roster as TRIAD SITE USER
- The Lead RA must update their roster with the staff members that need to submit via TRIAD on the CTSU website
- NON- RTOG sites need to update their rosters directly through the CTSU helpdesk
- After March 1st RT data for all NSABP, GOG and RTOG (NRG) trials will be submitted via TRIAD

Global Leaders
in Imaging and
Radiation Oncology
Clinical Trial
Quality Assurance

Welcome

Welcome to the recently launched Imaging and Radiation Oncology Core (IROC) website. Our overarching goal is to provide easy access to information about IROC's quality assurance (QA) services and processes for individuals at sites participating in NCI-sponsored trials. As the National Clinical Trials Network gets underway, the IROC team will work to make this website a comprehensive resource for imaging and radiotherapy quality assurance activities.

We welcome your comments and suggestions. Please contact us!

Where to find information on TRIAD (www.irocqa.org)

The screenshot shows the IROC website interface. At the top left is the IROC logo with the text "IMAGING AND RADIATION ONCOLOGY CORE" and "Global Leaders in Clinical Trial Quality Assurance". At the top right, it says "Administered by the American College of Radiology" with the ACR logo. Below this is a search bar and a navigation menu with links: "About Us", "Services", "Trial Credentialing", "Resources", and "News & Events". The "Resources" dropdown menu is open, showing links to "TRIAD", "Contouring Atlases", "QA Publications", "Contact Us", "Contact Us", and "Announcements". A large red arrow points from the bottom left towards the "TRIAD" link in the dropdown menu. Below the navigation menu is a large image of two people in white lab coats working with a medical device. To the right of this image is a sidebar with the text "Global Leaders in Imaging and Radiation Oncology Clinical Trial Quality Assurance". At the bottom left is a "Welcome" section with a paragraph of text. At the bottom right is an "Announcements" section with a small image of medical monitors.

Summary

- **The NCI NCTN Reorganization is how IROC started.**
- **IROC RT QA centers have decades of experience, knowledge and infrastructure.**
- **Protocol review as early as possible is critical to establishing appropriate QA procedures.**
- **Patient case reviews require IROC and Groups to work together.**
- **RT and Imaging are working closely together**
- **Be Patient, this is new to us as well!**

Thank You
